Meeting assets for Jerry Michalski's Zoom Meeting are ready!

Hi Jerry Michalski

The following assets for the meeting - Jerry Michalski's Zoom Meeting are now available.

Meeting summary

Quick recap

The Open Global Mind weekly check-in call featured updates from various members on their ongoing projects and personal reflections, including work in community organizations, food policy, and content creation initiatives. Several participants discussed challenges around collaboration, systemic inequities, and the evolving nature of communication and technology, particularly in relation to AI and new media formats. The conversation ended with discussions about the importance of diverse coalitions and healthy disagreements, along with reflections on personal growth and change, including Ken's move to Spain and various health-related experiences shared by participants.

Next steps

- Klaus: Hold kickoff meeting with Acro Regenerations later today
- Kevin: Work with the community leader on creating a third place gathering spot in Swannanoa using available funding
- Klaus: Continue developing AI agents to assist with transitioning from industrial to regenerative food systems
- Kevin: Work on a community investment fund for land in the neglected area

- Klaus: Work with retired Salesforce executive to launch regenerative agriculture initiative in Bend's high desert
- Kevin: Collaborate with his children on plans for their land
- Kevin: Explore community investment funds for land investment without federal government involvement
- Klaus: Guide Acro Regenerations on what type of data to source from farmers
- Klaus: Launch joint funding initiative with Acro Regenerations
- Rick: Follow up with Mark Kelly's administrative assistant regarding his shared ideas

Summary

Community and National Recovery Insights

Jerry led the Open Global Mind weekly check-in call, outlining the routine and emphasizing the importance of quiet moments and brief contributions. Kevin shared his experience working with a community organization in a flooded area, discussing efforts to create a "third place" for community gathering and addressing challenges in low-status neighborhoods. Gil reflected on personal experiences, including a recent concussion and the difficulty of disconnecting from screens, while also noting observations about national recovery efforts and a shift in political focus. Rob briefly mentioned attending the call due to a canceled work meeting and noted a perceived change in attention to DC affairs following Elon's departure.

Government Shutdown and AI Storytelling

Rob discussed the potential for a government shutdown in September and shared his thoughts on the importance of storytelling in the age of AI, mentioning his daughter's interest in film. Klaus talked about his work on food policy and his efforts to develop an AI system to support regenerative agriculture, highlighting the challenges of scaling up such initiatives. Rick touched on systemic inequities and the fragmented nature of the regenerative movement, emphasizing the need for collective action against these issues.

Exploring Co-intelligence and Collaboration

Rick discussed his interest in co-intelligence and his recent decision to subscribe to Perplexi AI to explore this concept further. He highlighted the challenges of handling content processes and the need for new learning methods to facilitate collaboration across divisions. Rick also shared his experience at a Labor Day parade where he met Mark Kelly's administrative assistant and expressed hope for sharing his ideas with the senator. Shawn spoke about his focus on understanding cognitive interactions during conversations and the technical architecture needed to support intercognitive frameworks.

Neobooks: Multimodal Content Innovation

Jose shared updates on his projects, particularly focusing on a new concept for "Neobooks" that integrates multiple modalities like text, audio, memes, and

video, allowing users to interact with content in various ways. He described progress on "Serving Life," a book project featuring interviews with figures like Kevin and Alan Savory, which is nearing completion with a target end-of-year release. Jose expressed excitement about this innovative approach to content creation and consumption, envisioning a future where authors naturally incorporate multiple formats into their work.

Understanding True Collaboration Dynamics

Scott discussed his reflections on the nature of collaboration, suggesting it might be more limited than commonly perceived. He proposed that true collaboration involves working separately, sharing, and then working separately again, contrasting it with the concept of teamwork. Scott shared examples, including an electronic musician's project and Wikipedia, to illustrate different forms of collaboration. He emphasized that genuine collaboration is rare and often misunderstood, describing it as a fleeting moment where two minds sync seamlessly. Jerry appreciated the sharing of projects and obsessions, but no specific actions or decisions were outlined.

Upketo: Spiral of Improvement

Jerry discussed his recent illness and shared updates on a new concept called "Upketo," which combines the principles of an upward spiral and Aikido. He explained that Upketo aims to improve everything touched, using Aikido principles of blending and sensing energies. Jerry mentioned a fledgling website and a private LinkedIn group for discussing Upketo. He also touched on his work on "Design from Trust" principles, which overlap with Upketo's principles, and plans to share more about this in the future.

Journey of Letting Go

Ken shared his personal journey of downsizing and letting go as he prepares to move to Spain, reflecting on the bittersweet process of releasing possessions and memories while finding peace in the simplicity. John acknowledged Ken's process as a form of necessary rebirth and emphasized the importance of letting go to allow for reconstruction, resonating with the shared experiences of others in the group.

Global Policy and Health Updates

Mike provided a report from Washington DC, mentioning his late arrival due to a meeting on global data policy and expressing concern about the current political climate. He shared his recent experiences in Manila and Taipei, including a meeting with the HYRA Network, a company working on blockchain and AI. Mike also discussed his health issues, including neurological symptoms and a recent diagnosis of Lyme disease. Jerry inquired about RFK's potential impact on HHS, particularly regarding food safety and environmental issues, to which Klaus expressed pessimism about the effectiveness of such initiatives. Kevin offered to assist with the Plex initiative and emphasized his willingness to help gather community news.

Advancing Interaction Analysis Technologies

The group discussed collaboration and the challenges of identifying and managing different types of interactions, with Shawn and Jose sharing their work on "hyper video" technology for capturing and analyzing interactions. Jerry noted that recent advances in AI, particularly LLMs, are now capable of many of the manual processes the group has been working on. The discussion touched on the importance of having sufficiently diverse coalitions to allow for healthy disagreements, with Gil referencing Bernice Reagan's quote about discomfort in coalitions. The conversation ended with Ken sharing a poem by Maxine Kumin about hunting, which Jerry described as hitting "right to the heart of something important."

AI can make mistakes. Review for accuracy.
